CONTACT REPORT

PRODUCT: CADROIT

0930 - 1230

Date of Contact: 14 January 1954

Approximate length: 3

Present: Agent (s): CARBOHYDRATE

Case Officer (s): [] , the LCFLUTTER representative from FRAM
and []

(1) Agent submitted _____ written reports on (main subjects):

DECLASSIFIED AND RELEASED BY
CENTRAL INTELLIGENCE AGENCY
SOURCE/METHOD/EXEMPTION 382B
NAZI WAR CRIMES DISCLOSURE ACT
DATE 2006

(2) Agent reported orally (to Marine orally; if detailed report necessary, submit in separate sheet and attach to this form)

1. The purpose of this meeting was to LCFLUTTER CARBOHYDRATE.

2. For approximately 1 hour prior to the actual LCFLUTTER, CARBOHYDRATE was given the LCFLUTTER review and a general interrogation in review of his French connections. [] and [] thereupon left the room and the LCFLUTTER was conducted by the Frankfurt specialist.

[] 3. Upon completing the LCFLUTTER this specialist called [] and in and pointed out the following indications:

A. An indication of slight abnormality, i.e., anxiety, could be observed in the breathing pattern of CARBOHYDRATE.

B. CARBOHYDRATE indicated sensitivity (i.e., possible falsehood) re only one critical question. This was the question which was stated "Have you ever met Calinet at your home or at the office." A detailed discussion of this sensitivity took place between [] , the specialist, and []

but this arrived at no concrete conclusion. Since CARBOHYDRATE had apparently told the truth re all of his other connections with the French, there could seem to be no good reason why he should not admit having met the man at his home or the office if it were so. The possibility exists, of course, that CARBOHYDRATE was not sensitive to a Galinet visit at his home but rather that the term "home" of "office" raised in his mind some other sensitive factor such as other contacts which he may have in his home or office concerning which he has not informed either [redacted] or the undersigned. Each time CARBOHYDRATE was asked this question he indicated sensitivity and also each time as he was asked it he stated that he did not know but that Galinet might have been at his home and seen his wife or had just dropped by and seen no one.

C. The LCFLUTTER specialist stated his opinion that CARBOHYDRATE was quite shrewd and probably above normal in intelligence. CARBOHYDRATE made no effort to cover up in any respect. A slight reaction was noted in one control question (do you believe in God) when he answered no.

D. Throughout the LCFLUTTER CARBOHYDRATE was completely cooperative. The LCFLUTTER specialist noted that, and further, made mention that CARBOHYDRATE has a tendency to be slightly vague in details. However, he did not believe that to be a particularly important feature.

5. [redacted] is preparing a cable answer to Wash concerning the LCFLUTTER and will also prepare a detailed contact report. Special reports are also being prepared by the LCFLUTTER specialist.

6. CARBOHYDRATE informed [redacted] and [redacted] privately that he had been reprimanded by Henard for having told [redacted] and [redacted] contact with CARBOHYDRATE is, of course, unknown to [redacted] that CADROIT mailers are picking their material up at headquarters which in fact was not true. CARBOHYDRATE attributed his earlier error in this respect to the fact that the man whom he questioned in CADROIT was partially deaf and had not understood his question properly. As a matter of record, CARBOHYDRATE was instructed that such information critical or otherwise regarding CADROIT security should be brought to Henard's or Ladell's attention either concurrently or before it is brought to our attention, so:

A. That either of the two mentioned individuals have the opportunity to take appropriate action, if such is needed.

B. And also, to underline the cooperative position that CARBOHYDRATE should have with CADROIT.
